SUMMARY

As a student driven by a passion for discovery and learning, I am constantly motivated by my thirst for knowledge and deep interest in software development. I am someone who enjoys taking on new challenges to broaden my skills and gain enriching experiences. Currently seeking a summer internship, I am excited about the opportunity to apply my knowledge and contribute to stimulating projects.

REFERENCE

PROFESSIONAL EXPERIENCE

First-Year Bachelor's Internship (Orientation Internship)

XanWeb GmbH | janvier 2023 - fevrier 2023 | Present

- I received an introduction to the foundational aspects of web development, covering various tools and technologies utilized in website creation and construction.
- Tools included PHP, HTML, CSS, SCSS, Bootstrap, CMS, and jQuery.
- Additionally, I was initiated into collaboration and version control, employing tools like the Git system.
- During the internship, I learned how to ensure website maintenance and debug issues using inspection tools such as Chrome DevTools.

Second-Year Bachelor's Internship

Private school Hannibal | janvier 2024 - fevrier 2024 | Present

Developed a web platform for blood donation utilizing the MEAN stack and Socket.IO library.

- Implemented robust user profile management, allowing users to create, update, and manage profiles, including vital information like blood type.
- Enabled seamless sharing of blood donation requests, fostering community engagement and awareness.
- Facilitated streamlined feedback submission, empowering users to communicate their donation experiences and encountered issues to the admin.
- Administered user accounts, maintaining platform integrity through proactive management and deletion when necessary.
- Reviewed and addressed user feedback promptly, enhancing overall user experience and satisfaction.
- Provided comprehensive statistical insights into the user base, categorizing registered users by blood type for optimized platform management.

PROJECT

Developed and implemented an e-commerce website using HTML, Bootstrap, JavaScript, and PHP.
